Background:

A lethal virus decimated the world's population over 3 years ago.

It's apparent that Monolith Corp was behind the spread of the disease, but because of the disorder left from the billions of lives lost, governments and law enforcement are focusing on keeping order and supporting infrastructure instead of tracking down those responsible.

The World Justice Organization has plans to use their limited resources to prove that Monolith was responsible and rally the international community to bring them down.

Monolith's motives are unclear, but the series of events behind their plan will slowly come together.

You are a PRO, a Primary Retrieval Operator, who will use your set of unique skills to infiltrate the areas of operation, locate the evidence and return it to be processed.

Standing between you and your objectives is the MSF, Monolith Security Forces, whose sole purpose is to protect the interests of Monolith.

It's time for the world to see what they did and how they did it.

Libera iustitia. Gear up, PRO, and move out.

Kind of dissapointed but i still reccomend it. So far 2 major flaws first lack of online multiplayer and second no tutorial-training. Some minor bugs but overall gameplay is good and enjoyable, pretty relaxing little game to pass your time. If you like soccer there is no chance you wont like this one although it still doesnt justify it's price.. Despite SWAT4 taking the eventual crown of tactical coop game due to it's impressive ease of access and simple controls, in my opinion SWAT 3 is the truly groundbreaking achievement that to this day set the bar so high, modern titles can be measured by it's standards.

This is the best of the series, hands down, due to one thing that transforms SWAT series into the masterpiece - the AI. No other game, not even Rainbow Six series has ever come CLOSE to the levels of proficiency squad AI presents under our command. With every order given they move in formations, cover flanks and entry ways, as they ascend staircases, our servicemen use proper procedures. They are so efficient, you could technically go through entire game just issuing them orders and not fire a single shot yourself while doing so.

I remember people praising Hideo Kojima's MGS2 for 'emulating' realistic movements, authentic procedures, etc. while in anything but cutscenes the AI seemed dumber than a bucket of gravel. Even the sequel to this series, SWAT 4 could not match the excellence of SWAT3 in this regard. Rainbow Six's AI needed almost excessive handholding to get missions done right IF at all.

The reason I'm seriously still going on about your team's AI is crucial, cause graphics are good for the time, that's given, sound, map design, you surely have heard people praise those. But you have no idea what a game changer it is to have a TACTICAL shooter, where you can TRULY depend on your team! It's TEAM of professionals who ACT like Professionals and no other game managed to convey that, not even most modern ARMA's or similar titles.

(I mean sure, there are some cases where pathfinding plays tricks on you, or some bug occurs and an operative can get stuck, but those are rare cases - testament to this game's age rather than lack of effort)

If you want to play this game, go for Last Resort Mod Pack, it'll enhance your game even further.. This is such a relaxing puzzle game. I'm familiar with this sort of puzzle genre from my time playing Link-A-Pix, so I was glad to see this kind of game on Steam. Beautiful bgm, and pleasing UI. A lot of content, too: plenty of puzzles, a puzzle editor, and Steam Workshop support. That's a lot of content for something this cheap.. Game takes some time to learn how things work.. Cool game, gives you a cool retro feeling.

The gameplay is simple and nice and the fast phase of the game really pumps up your adrenaline.

. Hey... its free!. My arm hurts now.. Amazing game don't know how it's not a big hit. This is an oft overlooked classic, and deserves a play. Designed on Sierra's AGI platform, players familiar with the original King's Quest, Space Quest, and Leisure Suit Larry games from the 80s will feel right at home. The game offers replayability, as there are three different paths from Brooklyn to Sacramento, each with its own unique challenges and puzzles to overcome. The designers also painstakingly went to great lengths to include various points of historical detail about The United States as it was being formed, and the sacrifices made and hardships endured by those who risked the journey across... granted, it's a work of pure fiction, but it paints a believable picture, at least believable enough for an 80s adventure game to be immersive.

Well worth a play for the price.

Most Tower Defense games are pretty straight-forward, often only having a few towers and/or few ways to beat the maps. DW2 has many viable tactics. You can endlessly invest in the many towers and even customize them by 'equipping' dropped items (much like gear in Diablo2, and many other games since), and even adjust the difficulties of the maps (with higher difficulty getting better rewards). This satisfies players who just want to advance and those who are looking for a challenge.

While the pixelated graphics are... dated, at best, the gameplay is quality. I'm quite impressed how, for example, units have varying weight values, which lets little guys being easily flung around by your physics traps, while bigger ones stubbornly try to resist those forces.

I'm pretty sure any fan of the Tower Defense genre will enjoy it.. absolutely unable to play crusader---game freezes going beyond first screen. A simple, hardcore platformer.. had fun with it for a couple hours, then i got progressively more annoyed with it.. Very fun and brilliant as a freebie Bomberman game. Would like the controls to be tweaked to mirror Bomberman more as currently feels too inconsistent. Move a whole square rather than having to run through the square you're currently on to the next and sometimes get stuck running at an angle. Looking forward to further updates and see where this game goes.. The game sucks.... dis game sux but get it cuz it makes u luk lik u haz mor gamz
